STALKING

**Blaser**  
safaris

Safaris can be conducted throughout the year; however the best time for a safari is between April & October. Some 40 different species of game can be hunted across the country, but each safari is individually planned to give you maximum enjoyment & satisfaction. The safari is suitable for the whole family, including non-hunters; there are a variety of interesting, photographic tours.

# GENERAL TRAVEL INFORMATION

## CURRENCY

1 Rand (R) = 100 Cent (c)

## TIME DIFFERENCE

CET +1 h

## ELECTRICITY

220 Volt/50 hertz alternating current, three-pin plug sockets (adapter required)

## ENTRY REQUIREMENTS

Please note the entry rules for each country. You can obtain this information from the relevant consulate. If you are a visa, please note that you are responsible for obtaining the visa yourself.

## CLIMATE

The geographical and climate conditions in the country generally do not require a different way of life. The climate is generally very pleasant and mild. The seasons are offset by 6 months compared to Europe: Winter happens during European summer and vice versa.

Due to its size and the different landscapes, South Africa has a variety of different climate zones (subtropical to Mediterranean climate, but the evenings and nights can be very cold in the winter months).

Summer rain from October to April in the northern and eastern parts of the country; rain also in winter on the south coast. The temperatures at higher elevations (Johannesburg and Drakensberg) can drop below freezing in winter.

## INSURANCE

Taking out travel insurance in case you fall ill or require ambulance services is strongly advised.

## HEALTH

Larger cities in South Africa have (private) hospitals and doctors meeting the highest international standards, but also charging correspondingly high fees. If medical treatment is sought, payment has to be made directly on site (in hospitals usually by paying a deposit before admission).

### Vaccinations

Please check the vaccination rules for each country. This information is provided by the relevant institute for tropical medicine. If vaccinations are required, please note that you are personally responsible for complying with the rules.

No vaccinations are required on entry, except when entering from an area where yellow fever is present. However, apart from the basic vaccinations for all travelers (diphtheria/tetanus/polio, hepatitis A & B, typhoid), the Center for Travel Health recommends that independent tourists and those planning an extended stay have a preventive vaccination against rabies.

Please note the changes in vaccination requirements for travelers via Johannesburg, South Africa on outbound and especially on inbound flights (in force since 6/6/2011):

According to South African law, all travelers from the following countries **MUST** be vaccinated against yellow fever: Angola, Benin, Burkina Faso, Burundi, Central African Republic, Cameroon, Chad, Republic of the Congo, Cote d'Ivoire, Democratic Republic of the Congo, Ethiopia, Gabon, Gambia, Ghana, Kenya, Mali, Niger, Nigeria, Rwanda, Senegal, Sierra Leone, Somalia, Sudan, Togo, Uganda, Tanzania, Zambia.

Because of the current development mentioned above, we recommend (it is not currently law, but you should take it into consideration) that travelers have yellow fever vaccinations for visiting the following countries in southern Africa: Mozambique, Zimbabwe, Botswana

Malaria prophylaxis (in particular the use of good insect repellents on skin and clothing) is expressly recommended for the Kruger National Park, the northern KwaZulu-Natal and the neighboring regions around St. Lucia as well as parts of Mpumalanga and the Northern Province, in particular during the humid summer months (November to March). For trips to KwaZulu-Natal, special care should be taken regarding hygiene and only bottled water should be consumed due to the risk of a cholera infection. Tuberculosis is also relatively widespread in South Africa and cases keep increasing. A TB vaccination is therefore recommended, especially for children.

### Caution

Following standard hygiene measures, such as frequent hand washing, is generally sufficient.

In towns and areas with fewer tourists, take care when consuming raw fruit and salads. The tap water is usually drinkable, but care is still advised. Schistosomes (bilharzia), a parasite occurring mainly in stagnant water, is present in all southern African bodies of water – appropriate care must be taken.

During the humid season in particular, ticks are prevalent and cause tick bite fever. While not life-threatening, it causes high fever and severe weakness and requires an extended convalescence period. Taking a travel medical kit containing your regular medication plus medication for common travel-related illnesses is recommended.

# HUNTING AREA LIMPOPO

In the North of South Africa, in Limpopo, Gerhard Pro Hunting Safari offers you the best hunting opportunities. Our hunting farms are mostly privately owned and offer you best trophy hunts on 37 000 ha.

Thabazimbi is situated in the western region of Limpopo in South Africa.

The area is characterized by rugged mountains and relatively untouched bushveld. Marakele National Park is located about 20 km northeast in the heart of the Waterberg. The mountains and valleys characterize the unique untouched nature and diverse life. As our lodge is situated at the foot of the Marakele National Park, our hunting areas are in the foothills of the Thabazimbi area. In this Bushveld it is not easy to hunt, as it is a rough area and the weather in season has a great influence on how to find the best trophies.

## ACCOMMODATION

---

In the fabulous lodge you can expect excellent service to meet all your needs. There are three chalets fully equipped for 5 to 6 people, so you will want for nothing.

## POSSIBLE ITINERARY

---

### Transfer with car:

From / back Johannesburg Airport around 2 ½ hrs

<b>DAY 01</b>	Departure from Europe
<b>DAY 02</b>	Arrival in Johannesburg, meet & greet, transfer to camp
<b>DAY 03–08</b>	For example 6 hunting days
<b>DAY 09</b>	Transfer to airport, return flight
<b>DAY 10</b>	Arrive in Europe

## RECOMMENDED EQUIPMENT

South Africa can be warm to hot during the months of April, May, September and October (68°–85°F). The months of June, July and August are winter and can start with night temp's dropping to below zero, warming up to around the mid 60°F or 68°F by midday.

### CLOTHING:

---

2 Pairs good walking boots or running shoes (run in)

---

4 Pairs good socks

---

3 Pairs long hunting pants (dark khaki or olive green)

---

3 Pairs short hunting pants (early hunts – april, may in South Africa)

---

3 Pairs hunting shirts (dark khaki or olive green)

---

1 Realtree coverall with zip

---

1 Hunting Jacket – realtree type camo (dark khaki or olive green)

---

1 Warm sweater or jumper

---

Gloves

---

Suncream

---

Cap or hat

---

Casual wear for evenings

---

Insect repellent

---

Personal camera equipment / binoculars

---

### PLEASE NOTE:

Military type cammo is not permitted in most African countries, but Realtree type camo is normally accepted. Laundry is done each day except for the days when you change camp and the day of departure.
