# GENERAL TRAVEL INFORMATION

## CURRENCY

New Turkish Lira (YTL) = 100 Kurus

## TIME DIFFERENCE

MEZ +1 h

## ELECTRICITY

220 V/50 Hz alternating current, continental European plug

## ENTRY REQUIREMENTS

Please note the entry requirements for the respective country. Information can be obtained at the responsible consulate. In case a visa is needed, please be advised, that the acquisition is your own responsibility.

## CLIMATE

Given the topographical diversity of the country, the climate varies greatly depending on area. The climate becomes increasingly harsh as you travel east. The Black Sea coast has high levels of precipitation and is relatively cool. The Aegean coast and the Mediterranean coast have a Mediterranean climate with high temperatures, especially on the southern coast of Türkiye at the height of summer. Ankara and the Anatolian highlands have a typical continental climate with hot summers and cold winters.

## HEALTH

It is only the large cities that have some university hospitals and large hospitals equipped to the latest standards. However, primary medical care is generally considered adequate. Secondary and post-operative care, on the other hand, is often very poor, as the sanitation and hygiene in hospitals do not meet Western standards.

The situation in private clinics, especially in the capital and in Istanbul, is better. As you travel away from the main centers, the quality of medical care falls. The Austrian St. George Hospital in Istanbul is run by Austrian nuns. There are enough pharmacies available.

Recently, an increased in cases of typhoid fever, Crimean-Congo fever (transmitted by ticks) and swine flu has also been reported in major cities (Ankara and Istanbul).

Anyone who has to take certain medications all the time are advised to take them or at least a list of ingredients with them, because in many cases only generic drugs or drugs with other names are available in Türkiye.

### Vaccinations

No mandatory vaccinations for travel here. [Please note the respective entry requirements for your home country.]

However, apart from the basic vaccinations for all travelers (diphtheria/tetanus/polio, hepatitis A, and typhoid), the travel clinic recommends that individual tourists and campers have preventative vaccinations against infectious meningitis, hepatitis B and rabies. Preventative malaria treated is recommended in southeastern Anatolia and on the Adana and Mersin plains.

### Caution

Generally speaking, following standard hygiene measures, such as washing your hands frequently, is sufficient. Caution is advised when eating raw fruit and salads. You should avoid drinking tap water where possible. We strongly recommend avoiding eating raw or undercooked meat. We recommend caution when eating minced meat and unwrapped ice cream. Only eat fresh fish inland in winter (because of the long transport routes). Taking a first-aid kit containing your regular medication plus medication for common travel-related illnesses is advisable.

## INSURANCE

You are strongly advised to take out travel insurance for illness and ambulance services.

# ARRIVAL AND ACCOMMODATION

Depending on the location of the desired hunting ground, you can fly to Antalya, Ankara or Adana. There are direct flights from many countries in the world via Istanbul or Ankara to Adana (Adana is their base): WildHunting Team will meet you in final destination airport in Türkiye and clear the rifle at the customs with their companies' paperwork. Only in Istanbul there is an extra € 100,- fee.

## VILLAS AND HOTELS

The comfortable and pleasant stay during the hunting trip is very important for our partner. The accommodations vary according to hunting areas and client requests and are classified into 3 groups:

The family Villa in Adana at the start and the end of the hunt. Hilton or Sheraton (5\* Hotels) in Adana, for one night at the start or end of hunt.

During the hunt in their historical and beautiful "Namrun Villas" at the hills of the Taurus Mountains.

From Namrun Villa, there is access to 2 of our Ibex Concessions within 30 – 45 minutes driving distance from our hunting estate.

Comfortable small Hotels that are situated in the closest town to our other Ibex concessions.

# GAME SPECIES

Anatolian Bezoar Ibex is the most popular big game of their mountains and has a very special reputation amongst hunters from all around the World.

They organize other big game hunts such as; Anatolian Stag, Anatolian Chamois, Anatolian Gazelle, Western Kaunos Ibex, Hybrid Ibex, Konya Sheep and Anatolian Boar.

By booking, we can show you nearest town or during the booking process, we can indicate the possible area, but exact hunting area will be determined 5 days to hunting date.

Game species	Hunting season	Region around
Anatolischer Bezoar Ibex Nemrut Ibex (Hybrid) Kaunos Ibex (Western)	Bezoar Ibex can be hunted from October 01 to March 31. The most efficient time to hunt is between 01 November and 15 January. The rut is between mid-November to end of December.	Mersin Adiyaman
Anatolian Chamois	From October 01 to January 31. November is rutting period.	Artvin
Anatolian Konya Sheep	From October 01 to January 31.	Konya
Anatolian Wild boar	biggest old boar is from February to October. The rutting season starts around November and lasts about one month until December.	Bolu Mugla Erzurum Adana
Anatolian Red stag	Best time for the hunt is when the stags start roaring from mid-September through mid-October which is the rutting time.	Danizil Ankara
Anatolian Mountain Gazelle	From September 01 to December 15.	Urfa

# HUNTING COSTS AND ADDITIONAL TROPHY FEES

## ANATOLIAN BEZOAR

Anatolian Bezoar Ibex is a species of Ibex only unique to Türkiye and have the longest horns and the largest body size among all Ibex species around the world. Although their trophy average over the last years have been over 45 inches. They also harvest a dozen or so of very big trophies between 48 inches and 53 inches each hunting season. All Bezoar hunt require clients to precisely shoot 250 meters up to 350 meters. Before the hunt starts, they will take client to shooting range and see his shooting if he cannot shoot well that day will be spent to practice and they require all clients to come with their allowance of 50 Bullets.

### AREA A & B:

A = Secret Valley / B = Brothers Valley

For area A and B there will be minimum 4 guides pre-scouting before the hunt and our partner will 100 % know the trophy they will harvest. For area A and B, average success are 3 hunting days. Walking is usually not more than 2 km from easy trail or downhill they have roads everywhere in these areas and the car will follow them everywhere they go so they will be close to the road but these areas are very special and sold out ahead of time. For the Area A is very, very easy walking.

Area B requires some walking and is for the real mountain hunter who wishes to have a luxury hunt and see many good quality trophies.

### AREA C:

C = Rocky Valley

Area C is a real mountain hunt client must be in good condition – walking up to 5 km per day can be necessary but not everyday only to shoot Ibex. Less road access in hunting area.

## ANATOLIAN MOUNTAIN GAZELLE

The Anatolian Mountain Gazelle has been very recently opened for Hunting after being protected for over 40 years. The gazelle is found in the desert like open rolling hills around the city of Sanh Urfa. Although there are few licenses available, this gazelle is high in numbers and it is possible to find very good sized trophies in this well managed Hunting area. Over the last two years, they have organized the most number of hunts in this area and also have harvested an exceptional World's Record gazelle that may possible rank top three in its category of species.

<b>Anatolian Mountain Gazelle hunt – Duration 2 days</b>	<b>Hunting costs/hunter (USD)</b>
Dates: 1 September to 15 December	18,500,-

Hunting license, temporary hunting certificate, Trophy preparations-skinning and boiling of skull	In hunting costs included

Please consult for detailed information, only several licenses granted per each year is given to our outfitting company. This sheep is one of the rarest wild sheep in the World.

## ANATOLIAN RED STAG

The Anatolian Red Deer is one of the biggest free-ranging wild deer specie in Europe. This stag is found throughout our country and lives in areas with healthy population. A mature male weights about 300 – 350 kg and have horns that grown very large with over 10 kilos of weight and up to 24 points. The areas we hunt in have very good population and especially very high trophy quality.

<b>Anatolian Red Stag hunt</b>	<b>Hunting costs/hunter (USD)</b>

# BOOKING TERMS AND CONDITIONS

## **DEPOSIT AND BALANCE:**

A deposit of 50% of the total hunt cost is payable upon booking.

Deposits are non-refundable – the very principle of accepting a deposit is to confirm arrangements, to mitigate the total loss of a Hunt booking in the event of a cancellation, and to ensure a commitment by both parties.

The FULL balance of the hunting trip is due no later than ninety (90) days before commencement of your hunting trip.

## **CANCELLATIONS:**

**More than six months prior to the hunting dates:** full deposit is retained (50% of the total hunting costs is forfeited – the rest refunded).

**Less than six months:** 100 % of the total hunting costs are payable by the client.

## **CONDITIONS:**

Travelling days, included on duration of programs.

If all trophies booked are collected; hunt is over.

If trophy is wounded or missed, the client is responsible of paying the license fees or costs agreed on the contract. In the event of the client missing the given opportunity to shoot at a trophy animal during his 7 days of hunting trip resulting in unsuccessful trip, the client has the right to repeat the hunting trip a second time on the agreed dates before the end of the season by paying only daily fees. Client is entitled to agree on available dates with our partner.

## **RISK & RELEASE:**

There are certain inherent risks involved in participating in a Hunt. You acknowledge and agree that your participation in a Hunt is at your own risk.

It is your sole responsibility to take all appropriate medical advice prior to departure as a whether you are fit enough to undertake the Hunt booked. Our partner shall not be liable for illness, injury or death sustained on a program sold by the Company, which is not due to the gross negligence of the Company.

# RECOMMENDED EQUIPMENT

---

Good quality binocular minimum 8x magnification

---

Good quality "broken in" boots

---

3 Pairs of synthetic blend socks and liner socks

---

3 Pairs synthetic long underwear pants and shirts

---

2 Pairs of synthetic fleece low nap pants

---

1 Belt

---

2 Synthetic light weight shirts

---

2 Heavier synthetic zip up shirts

---

1 Light/medium synthetic zip up jacket (depending on anticipated temperatures)

---

1 Compressible "Hollow fill" style liner coat for cold weather

---

Quality light weight rain gear pants and long coat

---

1 Pair light weight leather/synthetic gloves & 1 pair thicker cold weather mittens if necessary

---

Fleece neck warmer (can be used as a stocking cap also)

---

Sleeping bag and pad appropriate for temperatures you plan on enduring

---
